

# Credit Bureau Services

In the digital age, the challenge that businesses face is ensuring that the magnitude of data they have access to is accurate, clean, insightful and secure.

## Our proven approach

We assimilate and analyse data on millions of consumers and businesses, updating tens of millions of records weekly. We invest heavily in keeping our data recent, accurate, powerful and secure. We have an intensive focus on identifying, collecting, storing and processing alternative credit data, enabling financial inclusion.

We continually invest in maintaining as close to 100% uptime as possible, and we have highly responsive systems, which are adaptable to the demands of new technology, systems, laws and business practices.

## Our services

We support our clients' credit decisions and mitigate risks with our data, insight and prediction solutions. Our consumer and business service offering includes:

- Data and credit reports
- Affordability assessment tools
- Verification services
- Loan application management systems
- Credit scores
- Research reports
- Batch-data processing
- Prediction tools
- Credit data processing
- Decision tools
